Sensory Circuits

Sensory Circuits are a series of motor activities that aim to support with sensory regulation. Learn about how to structure a sensory circuit.

Feedback: "Class teachers have noticed more engagement and reduced anxiety. They have seen the difference when children come back regulated"

Enquire via email

Fun with Food

Online training and support with setting up a food play group in your setting for children that are not open to trying new foods.

Feedback: "Before the intervention, Child A struggled to try new foods and became anxious during snack and lunchtime. After the intervention, Child A fully enjoyed the experience and became more confident engaging with different foods through play."

3rd June at 09:00- 11:00
Virtual (book via Eventbrite)

Ready, Steady Reception

Gain support and how to set up and run intervention groups in school including both Occupational Therapy and Speech and Language principles.

Feedback: "I feel confident in delivering these interventions and adapting the strategies to meet the individual needs of the children I support."
