

Geography Knowledge Organiser

Frozen Kingdom

I already know:

- I can locate the Equator and North and South poles.
- I can locate countries and identify the features of maps
- I can locate countries and seas around the world.
- I can identify physical geography features by using images, atlases and maps.
- I know what a biome is and can describe different examples.

Key Vocabulary:

Antarctic Circle	An imaginary circle of latitude that lies 66.5° south of the equator. Everything south of this line is known as the Antarctic.
Arctic Circle	An imaginary circle of latitude that lies 66.5° north of the equator. Everything north of this line is known as the Arctic.
biodiversity	the variety of plant and animal life in the world or in a particular habitat, a high level of which is usually considered to be important and desirable.
environment	the surroundings or conditions in which a person, animal, or plant lives or operates.

I will learn:

- three famous polar explorers were Robert Falcon Scott, Roald Amundsen and Ernest Shackleton.
- where the Arctic and Antarctic Circles (Polar Regions) are located and what they are like.
- climate change is the Polar Regions biggest threat.
- about Polar tourism.
